

IN PERSPECTIVE

One tiny speck of dust floating in infinity, that's what we represent in this Universe. Nothing more and yet we are willing to crush our existence into oblivion. Why can't the human race look upon itself, as can an astronaut in space and see how from a distance we are all in the same fragile world, beholders of little more than our own time which is but a blink in infinity and put it all into PERSPECTIVE.

Edition of 8 plus 3 artist's proofs, 175 x 72 x 72 cm
