

## THE TWO SIDES OF NATURE

We often ponder which road to take. I wonder a lot about the good and evil in the world. There is a constant battle within us between these two. The ego and the superego – and in between is the id. This sculpture symbolizes all the parts of one's inner self. We hope that what prevails is the golden part of our soul.

Bronze, Edition of 6 plus 2 artist's proofs, 179 x 270 x 160 cm,
